5. SureSafe5™ Sterilization Wraps

SureSafe5™ sterilization wrap is an extremely tear proof and resistant non-woven material made of polypropylene which is perfectly suitable for heavy duty applications. Five layers material is made of three layers of spunbond polypropylene which ensure an extraordinary flexibility and drapeability, and two layers of meltblown polypropylene layers form an efficient barrier against bacteria. 2-side with different tones enables clinicians to rapidly identify tears/damage to sterilized packs..

FEATURES:

- Excellent strength and tear resistance
- Excellent resistance to abrasion
- Excellent sterility maintenance as microbial barrier
- Cost effective
- Easily identify tears or damage

STERILIZATION PROCESSES:

- Steam
- EtO
- Plasma

RANGE: BLUE, AVAILABLE IN THREE DIFFERENT WEIGHTS:

- Standard: 43gsm
- Heavy duty: 61gsm
- Extra heavy duty: 71gsm
